Experience: 11+ years

PROFESSIONAL SUMMARY:

Lead Flutter Developer with 11+ years building high-performance apps for Android, iOS and the web. I've led teams through 60+ projects with 98% user satisfaction and crash rates of 0.01% or less. I specialize in Flutter and Dart with native Kotlin/Swift depth, and I own delivery from requirements to release.

SKILLS

Languages and Frameworks: Flutter/Dart, Android with Java, Kotlin, iOS with Objective C, Swift, React, Ionic, Native Script, NodeJS.
Testing Practices: Unit and Integration Testing, Golden Tests.
Development Practices: Code reviews, Git, CI/CD - Continuous Integration/ Continuous Deployment.
Development Methodologies: Agile Methodologies, Scrum, Kanban.
Ongoing Skill Development: Machine Learning (actively learning, focusing on on-device ML models).
Other: Azure, Kafka, MQTT, Docker, Kubernetes, Terraform. Redis, KeyCloak, Microservices Architecture, Monolithic architecture

EXPERIENCE:

Lead Software Developer, **GenAquarius Private Limited, Noida, India** **Feb 2025 – Current**
- Lead the team and own web and mobile projects end to end, from requirements gathering through deployment and maintenance, while keeping the team collaborative and open to new ideas.
- Build healthcare apps with React, Node.js, Flutter and native Android/iOS, including HL7 integrations.

- Created and managed 5 Cross platform apps including design and animations.
- Collaborated with team and improved app while going through customer reviews.
- Arranged meetings with clients and stakeholders for requirement analysis and reliable software delivery.
- Upskilled with JavaScript.

Mobile Application Developer, **ILM Techno Solutions Private Limited, Noida, India** **Apr 2016- Feb 2020**
- Built and maintained 18 apps in Flutter/Dart, Java/Kotlin, Objective-C and Swift, and made the apps 30% faster through performance optimization.
- Worked directly with clients, including on-site visits for app updates and testing.
- Trained college students and interns in mobile development.
- Upskilled with HTML, CSS, Image editing, wireframe generation, Flutter and Dart.

Mobile Application Developer and Trainer, **Aptron Solutions, Noida, India** **Jul 2015-Mar 2016**
- Provided technical training to students.
- Upskilled with Programming foundation.

PROJECTS

Abhyaasa App: Flutter App. Duration 5 months.
Abhyaasa (iOS), Abhyaasa- Meditation SriSri (Android)
Daily Meditation app by Sri-Sri Ravi Shankar. Responsibilities include redesigning and rewriting whole app from Ionic to Flutter. Later on, added new functionalities like Challenges and Group Meditation etc.

StepSetGo: Kotlin, Swift, React
StepSetGo (iOS), StepSetGo (Android)
A step counter app with tracking and different rewards. Uses multiple sensors and 3rd party SDK to track the movement.

Elyments App: React, Kotlin, Swift. Duration 7 months.
Elyments(iOS), Elyments (Android)
Elyments is a Chat, Audio and Video Call App. Responsibilities include maintaining and updating the web, android and iOS apps. Apps were kept native to keep the best performance that native platform provides.

Mega Cabs: Kotlin, Swift. Duration 1 year.

Mega Ride (iOS), Mega Ride (Android), Mega Driver (Android), Mega Staff (Android)
Mega is a travel platform that provides transportation services on different airports. It had different versions as well. Booking, payment, Tracking, maintenance etc.

Novade: Flutter App. Duration 3 Months – Contractual for Bug fixing.
Novade Enterprise (iOS), Novade Enterprise (Android), Novade – Field Management (iOS), Novade – Field Management (Android), Novade (Website), Novade Lite (Website)
Novade is a field management platform for construction, inspections and maintenance, covering quality assurance, HSE compliance, site diaries, progress tracking and documents & drawings with offline mode. Worked on the Novade Enterprise and Novade Field Management (formerly Novade Lite) apps.

Foundry BC: Kotlin, Swift, Flutter, React.
Foundry BC (iOS), Foundry BC (Android), Foundry BC (Web App), Foundry BC Clinic (Web App)
Foundry BC supports young people aged 12–24 and their caregivers in British Columbia with drop-in and scheduled virtual counselling (messaging, audio and Zoom-powered video with screen sharing), peer support, group sessions and wellness resources.

SmartApp – Smart Appointment: Flutter App. Duration 1 year
SmartApp - Smart Appointment (iOS), SmartApp - Smart Appointment (Android)
Smart Appointment app allows any patient to make online appointments with doctors instantly. Responsibilities include Designing, development and release of the app. 1 year timeframe contains time for app upgrades and maintenance.

Udaya and WANI Apps: Flutter and Native Apps. Duration 1.5 years.
UdayaWANI (iOS),PM WANI (Android), udayaWANI - PM WANI App (Android), Udaya WiFi (iOS)
Udaya is a management app for Udaya routers and adapters, and the WANI apps are PM-WANI-compliant apps for finding, connecting to and managing free public Wi-Fi nearby. I managed every app variant, shipped new features, and built the Flutter–native bridge that let new apps combine Flutter and native code.

Rainmaker: Fantasy Gaming: Flutter App. Duration 6 months.
Rainmaker: Fantasy Gaming (Android), RainMaker Fantasy (iOS)
Rainmaker is a high skill-based and legal, Cryptocurrency & Stock fantasy gaming app for having practice and ease of use. Responsibilities include Design and development of the app.

*For any project links not working: Please search the name as is on Google and the reference will be available for any other app market.
